Strike out on a new path at our Radolfzell location on Lake Constance

Software Developer (all*)

Our six top benefits for you at a glance:

- A vigorously growing high-tech company in medical technology
- Market leader in 3D position measurement systems
- Flat hierarchies and a culture that values employees
- Tailored training options and opportunities to take on responsibility
- 30 days' vacation, flexible working hours, and a range of team events
- Company health scheme with various activities

What you bring to the team

- Wherever and however you learned it, you learned it well! Programming! Ideally in Python or C+/C++ and with several years' experience
- Terms like symbols, objects, linkers and ELF don't bring you out in a sweat
- When you hear the word subversion you don't think about political trouble, but look forward to clearly organized, versioned working
- You hold a university degree in a technical subject or a solid vocational training qualification. You also have good German and English language skills

Tasks you can look forward to

- Design, implementation, maintenance and (of course) documentation of hardware-related production and testing software for our production team and our customers
- Software development under Linux in Python
- Software documentation with the ALM tool Polarion

Just right for you?
Then we look forward to your application!
