### Hidden Champion in medical technology - we are proud of this!

#### INSIDE

Leading medical technology companies worldwide rely on our 3D tracking technology - we have been the global market leader in this field for over 25 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success. People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name - including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies - that's what makes work fun!

The development and support of our inspection and test systems in production would give you pleasure. You have a suitable solution for every problem? Then we look forward to welcoming you as a new engineer at NDI.

#### TASKS

- Together with colleagues from the product development and manufacturing engineering departments, you will be responsible for the development, verification and validation of new and modified inspection and test systems for our 3D tracking products and their components.
- You are also welcome to create individual test programs for standard devices such as the MicroView coordinate measuring machine used by us
- You will carry out the training of production staff and 1st level support in the test equipment you have developed at our premises, as well as at the premises of our contract manufacturers
- You will intensively contribute your expertise and experience to the creation of requirements for our test and inspection equipment

#### PROFILE

- You have completed a technical degree or have a comparable qualification in electrical engineering / mechatronics division, or you are a motivated career changer with many years of professional experience in the areas of measuring, inspecting, and testing
- You have knowledge in programming of test and inspection equipment
- You are characterized by an independent and proactive way of working
- You have a good command of German and English in order to be able to communicate with our colleagues and suppliers from all over the world
