INSIDE

Hidden Champion in medical technology – we are proud of this!

Leading medical technology companies worldwide rely on our 3D tracking technology – we have been the global market leader in this field for over 25 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success.

People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name – including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies – that's what makes work fun!

TASKS

Structured and precise but also communicative? This describes your personality, and you are able to ask questions exactly where it often hurts – you are not afraid of that? Then we look forward to receiving your application as a Quality Engineer!

- In cooperation with various departments, you are responsible for our complaints management. Because you are a strong communicator, you are also the first point of contact for our customers.
- In addition, you will be responsible for deviation management: as CAPA manager, you coordinate preventive and corrective measures as well as various process optimizations.
- You will independently conduct internal audits in our departments to monitor the maintenance of our ISO 13485-certified QM System, uncover potential for optimization and thus move us forward.

PROFILE

- The basis for your knowledge is a completed apprenticeship or university degree, preferably in a technical field.
- You are familiar with quality and process management based on ISO 13485 or ISO 9001 or you want to get familiar with these areas.
- Do you have a good technical understanding and enjoy working in a team, coordinating tasks, and communicating with external and internal departments? Then you are a perfect fit for us!
- You are optimally prepared for the international environment with our Canadian and American colleagues and international customers due to your good knowledge of German and English.
