Innovation in therapy and diagnosis - that is what we are committed to.

Leading medical technology companies worldwide rely on our 3D tracking technology – we have been the global market leader in this field for over 20 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success.

People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name – including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies – that's what makes work fun!

INSIDE

Your world is technology, and you are strong in problem solving? Are you looking for an exciting work environment and have a quick mind? Then become part of our Manufacturing Engineering team at NDI as an electronics or mechatronics technician (f/m/d)!

TASKS

- In this position, you will be the first point of contact (f/m/d) and first level support for our production employees and suppliers in the event of technical problems in assembling and testing in order to solve them and avoid production downtimes.
- You analyze technical errors in the event of returns and internal failures and initiate appropriate measures.
- We need your active participation in the acquisition and development of production aids for our production and also for our suppliers.
- You will also support us in the development, maintenance, validation and verification of new and modified inspection and test systems.
- You are responsible for calibrating NDI's own measuring equipment, and you also take on the role of ESD officer in our company.

PROFILE

- Successfully completed training as an electronics technician or mechatronics technician (f/m/d) is the basis for your knowledge, which you have ideally already been able to expand through initial work experience.
- You are characterized by a confident manner, logical-analytical thinking, strong communication skills and a goal-oriented way of working.
- Thanks to your quick perception and ability to adapt to changing working conditions, you always maintain an overview in your day-to-day work and can develop solutions independently.
- In the best case, you have already had contact with ISO 13485 or 9001 and are familiar with IPC and JEDEC.
- Your German and English skills are good, both written and spoken.
