**Innovation in therapy and diagnosis - that is what we are committed to.**

Leading medical technology companies worldwide rely on our 3D tracking technology – we have been the global market leader in this field for over 20 years. Our expertise as an innovative high-tech company for the realization of modern, digital solutions in medical application fields is a central component of our success.

### INSIDE

People work for NDI at four locations worldwide. The cultural diversity in our globally active company and the demands of the high-tech medical industry make for a stimulating work environment. The knowledge, enthusiasm and experience of our employees are essential to our success. And everyone knows everyone by name – including our colleagues in Canada, the USA and Hong Kong. We trust each other, are honest with each other and can celebrate with each other. And we do it across hierarchies – that's what makes work fun!

### TASKS

Would you like to be directly involved in the further development and thus the future of the products of a world market leader in medical technology and lead your own small team? Then warmly welcome you to NDI!

- Your main task will be to lead and develop a team of Research Scientists
- You will also work actively with your team to lay the foundations for our future products. This is done through theoretical and experimental preparation of new technologies or the development of functions for handover to the product development teams
- You are in charge of new NDI developments and drive them forward - you are responsible for compliance with, and further improvement of the software development processes, coordinate processes with the respective interfaces and maintain these processes in accordance with regulatory and company-specific requirements
- You represent department-specific interests vis-à-vis our locations in Canada and the USA and proactively shape further cooperation with the other locations

### PROFILE

- A university degree in engineering, physics or a similar technical field has formed the basis of your current knowledge
- You are suitable for the position if you have several years of professional experience in the field of research and development of mechatronic systems or applied physics. Knowledge of medical technology regulations is nice to have
- You are a strong communicator and maintain an effective communication style at all levels
- Experience in the professional and disciplinary management of employees is an advantage.
- English isn't just a typical breakfast for you
